I developed and taught my own curriculum for several undergraduate courses related to writing, reporting, media law, and design. The new curriculum I created often included novel games to make abstract concepts concrete. After receiving multiple awards for innovative instruction, I was asked to coordinate 11 part-time lecturers. I helped them with both instructional design and technology challenges.

As a staff reporter, I generated my own ideas and developed feature stories for the technology, health, business, and ideas sections of the newspaper. I also wrote a weekly column about the science and history of everyday products. While some

articles took weeks to research, others needed to be researched and written in a matter of hours.

Interactive Producer, MSNBC
